

SHEET INDEX

220 kW pk Power (PVP) - 1 of 4

HF-SENS902 - 4 sections

OC-INPUT - 3 sections

PHASE-III - 3 sections

CONTROL-BF - 1 section

rev A,4.3 - 24 sections - 2

NET NAMING

Interval junctions are named for what they join.

here's a code at that IC pin e.g. WINDC_VB

scatemo_<nm> tap between R-scatero-nim e.g. R

named connectors/sub/obj (see INTERBOARD LINKS)

SHEET INDEX

220 kW pk Control card (LV) - 4 of 4

PHASE-SENSE - 4 sections
RESOLVER - 4 sections
SAFETY - 4 sections
SBC - 3 sections
TEMP - 3 sections
COMMS - 3 sections
CONTROL - 2 sections
VDC-RECEIVE - 2 sections
CARD-I - 1 section
VEHICLE-I - 1 section

no A.x.3 - 36 sections - 220 components

NET NAMING

Internal junctions are named for what they join

Ground - #Pins ends at first 0 pin e.g. UNOSC_VSP

Resistor - R# endpoint of a series pair e.g. RES1_R

Resistor - series tag between Resistor e.g. RRES1_1

All others are explicit design info

Series names are another sheet + series ref, joined ONLY at the

Internal connections/labels from INTERBOARD LINES, design team
